

ACR 2007

**AFRICA COMPETITIVENESS REPORT 2007
AFRICAN DEVELOPMENT BANK, WORLD BANK
& WORLD ECONOMIC FORUM
SEMINAR ON FINANCE & BDS FOR
ENTREPRENEURSHIP DEVELOPMENT: HOW TO
EFFECTIVELY ASSIST SME CREATION AND
GROWTH
29TH OCT-1ST NOV 2007, TUNIS, TUNISIA**

The ACR 2007

Structure & Content

Part 1: Chapters

- Selected issues of competitiveness

Part 2: Competitiveness profiles

- Based on World Economic Forum data
- Overview of rankings and scores

Part 3: Investment climate profiles

- Based on World Bank data
- Country rankings per variable

The ACR 2007

Context

- ❑ **Renewed optimism** due to a much better **regional economic climate**. After years of economic stagnation, **Africa is experiencing an economic resurgence**, and the outlook for the region's economic prospects is broadly optimistic.
- ❑ But questions remain as to **how sustainable this growth will be over the longer run**. Most of the **current growth has been fueled** by a confluence of **external circumstances** and interventions, including high commodity prices, debt relief, and a favorable international economic environment.
- ❑ **Genuinely sustainable growth** must be based on **solid domestic foundations** rather than cyclical or exogenous factors: **African countries** must become **more competitive**.

ACR 2007 examines many aspects of Africa's business environment :

- ❑ assessments of the drivers of productivity and investment;
- ❑ the competitiveness and investment climate in the 4 largest economies of Africa;
- ❑ the effect of gender disparities on employment and competitiveness; and
- ❑ the role of new technologies in fostering a more dynamic business environment.
- ❑ The *Report* also details country competitiveness and investment climate profiles - the drivers of investment and competitiveness in each of the 29 countries covered.

The identified 5 Common Themes in the ACR 2007

- ❑ The importance of good policies to establish a sound business environment. Policies are more important than geography or the abundance of natural resources. Countries with sound policies have better growth and productivity outcomes.
- ❑ Access to finance is a major constraint to business in Africa
- ❑ Infrastructure is still one of the top constraints in the continent, particular energy and transportation
- ❑ Institutions in Africa need to be more business friendly and that corruption is still an obstacle in many countries.
- ❑ Africa has significant examples of success, however, sub-Saharan Africa, still lags in GCI primarily in the basics of infrastructure and education.

Global Competitiveness Index on Africa

- ❑ 29 countries covered (from North and sub-Saharan Africa)
- ❑ Comparisons with relevant developing regions—Latin America and Southeast Asia—as well as the ranks and scores of the four rapidly developing and large “BRIC” countries (Brazil, Russia, India, and China).

Global Competitiveness Index on Africa

- ❑ **Tunisia** is the **strongest performer**, ranked among the top 30. Tunisia also outperforms all comparator economies. Followed by **South Africa and Mauritius** (46th and 58th).
- ❑ Farther down are the other **North African countries**: **Egypt** (65), **Morocco** (72), **Libya** (73), and **Algeria** (76).
- ❑ All other countries are from the sub-Saharan region, with **Botswana, Namibia, and Kenya** as the **only three other countries within the top 100 countries**.
- ❑ **All other 19 countries from sub-Saharan Africa** rank among the **27 weakest performers** occupying **ranks of 102 or lower**.

Global Competitiveness Index on Africa

- **North African countries** are already assessed as **doing comparatively well in some of the more basic areas** measured by the GCI; **their focus should be** on improving the factors measured in the pillars of the efficiency enhancers subindex: most particularly **technological readiness** and **improved market efficiency**.
- In **sub-Saharan Africa**, efforts are needed on all **fronts within most countries**: upgrading **infrastructure** and improvements in the **health and education** of the workforce, as well as tackling weaknesses in the areas of **market efficiency** and **technological readiness**.

Global Competitiveness Index on Africa

- A number of **big economies** in **SSA** receive **high scores** in the **innovation and business sophistication pillars** relative to their overall ranking, while **neglecting more basic factors** that would help them migrate into a higher stage of development and achieve more sustainable growth.
- There are **strong individual country performances** throughout the continent in areas as diverse as **institutional quality, macroeconomic stability, business sophistication, and innovation**: these countries can serve as **regional benchmarks** to other countries, in efforts to improve competitiveness.

ACR 2007

**Competitiveness and
Investment Climate in SANE
Economies**

Introduction – The SANE Chapter

- Explores the structure, performance and competitiveness of the four largest economies in Africa (**S**outh Africa, **A**lgeria, **N**igeria, and **E**gypt – the SANE).
- Examines the major investment constraints facing firms in these countries and discusses the policy implications of the findings.
- Also makes some comparisons of competitiveness and investment climate in the SANE countries and BRICs (**B**razil, **R**ussia, **I**ndia, and **C**hina)

Chart 1: Sector Contribution to the GDP of SANE in 2005 – S. Africa has a more diversified economy while in the rest oil is vital to their economies

* Mining (Petroleum)

Industry (excl. Petroleum)

Source: Reserve Bank of South Africa; Algerian Ministry of Finance; Central Bank of Nigeria, December 2005; Central Bank of Egypt; AfDB Statistics Department

Chart 2: SANE's Average Real GDP Growth Rates, 1999-2002 and 2003-2006: - high growth rates, but BRICs, with exception of Brazil, much higher than SANEs

Source: *Economic Indicator: AfDB Statistics Department. African Live Database (WB), World Economic Outlook (IMF), September 2006*

Business Environment in the SANE appears comparable to, if not more favourable than, that in the BRICs

- ❑ On average, entrepreneurs in the SANE economies go through 10.5 steps to launch a business while in the BRIC is 12 procedures.
- ❑ It takes fewer steps to start a business in South Africa, Nigeria and Egypt than in Brazil, China and India.
- ❑ The average number of 286 days taken to license a business in the SANE economies is far less than the 407 days required in the BRIC.
- ❑ It takes 531 days to register a business in Russia, but 465 days to do so in Nigeria.
- ❑ SANE rank better than India and Russia on legal trade across borders index
- ❑ SANE face higher import costs than BRICs
- ❑ Very little intra-African trade by SANE, save S. Africa
- ❑ BRICs perform better than SANE on protecting investors

Table 1: The Nine Pillars of Competitiveness in the SANE and the BRIC – S. Africa & Egypt rank comparable to BRICs

	SANE Countries				BRICs Countries			
	South Africa	Algeria	Nigeria	Egypt	Brazil	Russia	India	China
Global CI	46	76	102	65	67	61	42	55
Basic Requirements	57	44	113	64	88	68	63	47
Institutions	31	65	93	50	85	119	33	96
Infrastructure	50	80	108	56	72	62	63	60
Macroeconomy	48	2	57	111	117	35	91	8
Health + Primary	106	46	119	51	48	78	96	56
Efficiency-Enhancers	45	92	90	75	58	59	41	72
Higher Education	57	86	103	77	61	43	49	79
Market Efficiency	34	97	71	66	59	60	20	55
Technological Readiness	44	93	90	80	53	72	56	78
Innovation/Sophistical Factors	29	92	69	65	38	72	26	57
Business Sophistication	32	106	75	57	38	79	25	65
Innovation	29	77	52	83	38	59	26	46

Chart 3: Corruption Perception Index (CPI) Rankings of SANE Countries (CPI) – S.Africa ranks least, while Russia and Nigeria highest

Source: Transparency International 2005 and 2006

Chart 4: Rankings of SANE in Quality of Infrastructure - S. Africa best ranked

Source: World Economic Forum

Table 2: Top Five Business Constraints Identified by Firms in the SANE

South Africa	Algeria	Nigeria	Egypt
Skilled Labor Shortage	Unfair Competition from Imports and Illegal Business	Power Failure	Macroeconomic Uncertainty (Inflation, Exchange Rate)
Labor Regulations	Lack of Working Capital	Poor Infrastructure other than Power	Unfair Competition from Imports and Illegal Business
Crime and Theft	Corruption	Lack of Working Capital	Corruption
Unfair Competition	High interest rates	High Interest rates	High Interest Rates
Obtaining Land or Building	Obtaining Land or Building	Macroeconomic Uncertainty (Inflation, Exchange Rate)	Lack of Working Capital

5. Africa - Policy Implications and Recommendations

Reforms in several areas:

- ❑ Reforms in the area of competition
- ❑ Labor reforms
- ❑ Tax regulations
- ❑ Restructure the financial sector.
- ❑ Increasing the number of judges specialized in business and fiscal issues.
- ❑ Address Corruption

Conclusion

- The **relatively positive economic** outlook across much of Africa, coupled with the **renewed focus and increased attention** from several institutions from within the region and beyond, now provide a **promising opportunity** to make the **institutional and structural changes** needed to **put countries in the region on a more sustainable growth path** and to **pave the way for a more prosperous African future**.
- *The Africa Competitiveness Report 2007* is meant to provide a useful **benchmarking tool**, and a **public-private platform for dialogue** in these efforts.

Conclusion

- ❑ The SANE countries have the size and the scale to be drivers of Africa's economic growth, regional economic co-operation, and integration into the global economy.
- ❑ However, the SANE would need to address key obstacles to competitiveness and investment climate before its potentials in both the regional and global economy can be fully realized.
- ❑ These countries also have the potential to serve as growth poles for growth and investment and contribute to the reduction of the population leaving in poverty in Africa.

ANNEXES

GCI 2007: AFRICA & COMPARATORS

Country/Economy	Overall Index		Subindexes					
	Rank	Score	Basic requirements		Efficiency enhancers		Innovation enhancers	
			Rank	Score	Rank	Score	Rank	Score
